

Above Grade and Below Grade Injection System

	Features	Benefits
Restorative	Creates restorative waterproofing membrane, stopping leaks at their source.	Seeks out leaks and stops them.
Adhesive	Adhesive in wet conditions, active water leaks, and on surfaces with foreign materials.	Ease of application and effectiveness.
Responsive	Remains as a flexible gel. Durable to vibration and continuous movement.	Waterproofing is maintained. No loss of adhesion or separation.
Ease of Application	One component. No mixing of chemicals, easy to apply, safe, easily stored and transported.	Cost-effective, reduce labor, save time, fewer mistakes in application.
Composition	High solids content, solvent free, made from recycled materials.	Non-toxic, non-flammable, safe application.
Durability	Chemically resistant, resistant to freeze/thaw cycling, dry/wet cycling.	Effective in many different types of environments. Permanent Repair.
